Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Allowable Subject Matter

1. Claims 12-16 allowed.
2. Claims 2, 5, 6, 8, 10, 18 and 19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3, 4, 7, 9, 11 and 17 rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (6,037, 263) in view of Cadien et al. (5,604,158).

Regarding Claims 1, 3, 4, 7, 9, 11 and 17, Chang discloses a method for plasma assisted CVD deposition of tungsten and tungsten compounds where a plasma containing a high density of active hydrogen species is maintained to scavenge fluorine and fluoride species formed by decomposition of the tungsten precursor WF₆. In Figs. 5 and 6, layer 44 is tungsten nitride barrier layer instead of the required tungsten barrier layer. For this reason Chang fails to disclose the required tungsten barrier layer. However, Cadien et al. disclose an integrated tungsten/tungsten silicide plug process where the required tungsten layer is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required tungsten barrier layer in Chan as taught by Cadien et al. in order to have a semiconductor device with higher performance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (703) 305-3868. The examiner can normally be reached on M - F 8:00 - 5:00.
